WHY CALEDONIAN STONE?

At Caledonian Stone, we go the extra mile for our customers. We have a helpful and knowledgeable customer service team who are here to help YOU in any way possible. We aim to make everything that much **easier** for our customers, from the first point of call right through to delivery.

WHY CALEDONIAN PORCELAIN PAVING?

✓ **LOW MAINTENANCE** - This is because it absorbs almost *no water* and therefore does not allow algae to grow, resulting in your patio staying considerably cleaner with only a light wash needed to remove any surface dirt.

✓ **ALWAYS LOOKS LIKE NEW -** Porcelain **never fades** or deteriorates, is frost resistant, and extremely durable.

✓ **HIGH QUALITY** - Our porcelain is manufactured by trusted European suppliers and goes through strict quality control so that it always meets our *high quality* standards.

FREE SAMPLES

Would you like to see a sample before making a decision? This is no problem as we offer a **FREE** Sample Service with NEXT DAY delivery. Samples can either be requested through our website www.caledonianstone.com, by email or over the phone.

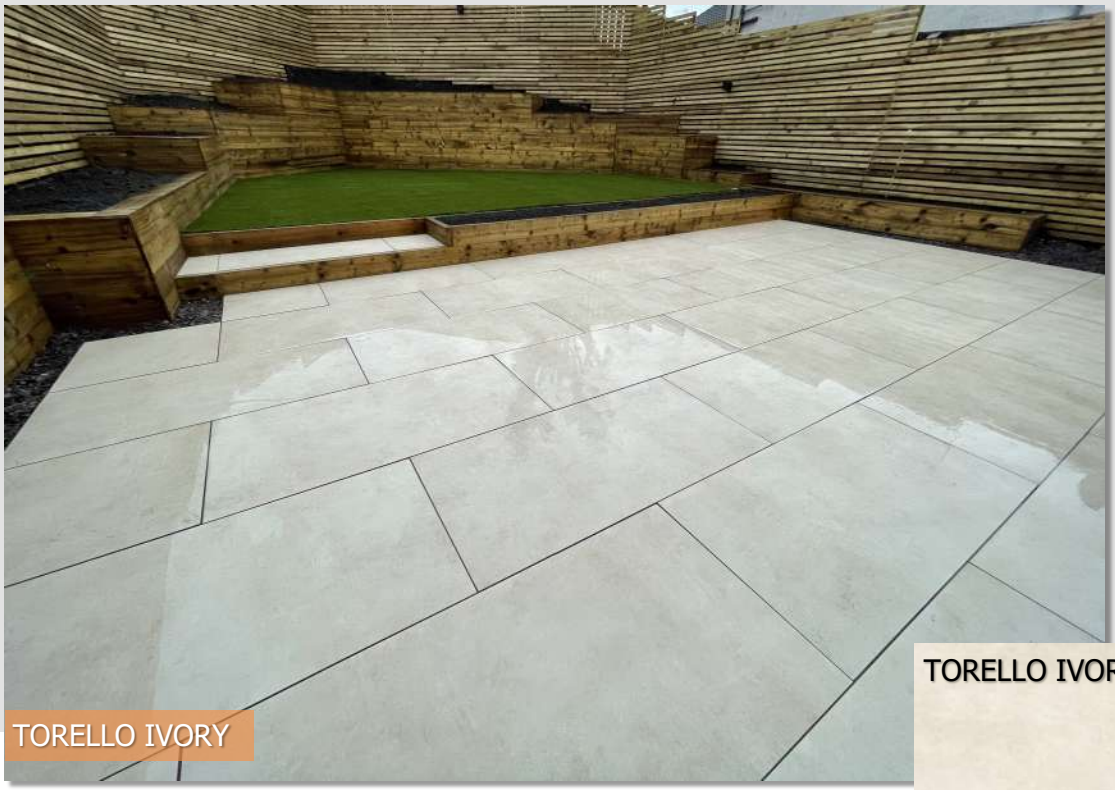
Torello Ivory 600x1200x20mm Paving

Torello Ivory features subtle detailing.

Porcelain Paving is made by baking a mixture of clay, sand and other minerals in a high-temperature kiln producing an ineredibly durable, non-porous material which therefore does not require sealing and provides for very easy maintenance.

CALEDONIAN
STONE

Torello



Torello Ivory has subtle detailing allowing it to fit into a range of different environments. Thanks to its low porosity, it is frost-resistant while also reducing the growth of moss and algae. Torello is available in the larger 600x1200mm paver size.

Thickness:	20mm
Slip Rating:	R11
Price Point	★★★☆

Tantallon Beige 400x1200x20mm

Unique Veining and colours giving it a natural look.

Our Porcelain absorbs less than 0.05 percent of water. This means that it is not damaged from frost like natural stone and ceramic paving. Its very low porosity also means it resists dirty or grimy contamination and is very low maintenance.

At Caledonian Stone we have a special range of porcelain which is practically indistinguishable from natural stone products. Our 'natural look' porcelain paving emulates the appealing characteristics of real stone such as colour variation, veining, fossilisation and a riven surface. This makes for a unique outdoor area that has the looks of natural stone while having the benefits of porcelain.

LAYING ACCESSOIRES

Laying porcelain paving is made easy by using our range of accessories. Our range of accessories have been chosen because they are **easy to use** and long lasting.

Our **Porcelain Primer** is what we recommend for a hassle free and easy to use primer. Below are some of the key features that makes it one of the best on the market.

- ✓ Single coat, fast application primer easily applied by brush or roller
- ✓ Can be applied up to **2 weeks** before laying
- ✓ Supplied in two 10kg bags to reduce waste
- ✓ Supplied in its own mixing bucket to reduce time and mess

Our **Porcelain Grout** has been specially formulated for porcelain paving.

- ✓ **Developed for joint widths of 2 to 20mm**
- ✓ Suitable for external and internal use
- ✓ Anti-mould growth technology with added silicone which limits mould growth and repels water
- ✓ Allows vapour to pass through the surface of the grout

Our **Brush-In** is a quick and easy solution to filling joints between paving slabs and setts. Simple to use allowing even the untrained hand to consistently deliver perfect joints every time.

- ✓ Cement free and non-hazardous
- ✓ Suitable for use in **wet weather** and is frost resistant
- ✓ Suitable for natural stone.
- ✓ Suitable for 3mm joints and upwards

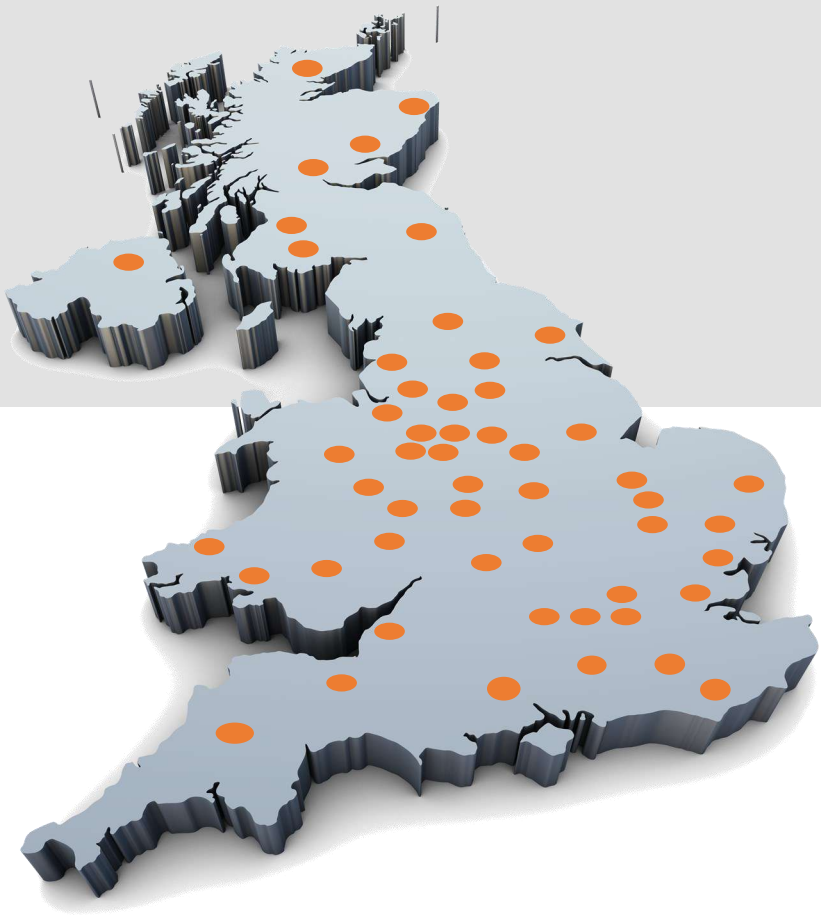
NATIONWIDE SHIPPING

Do you want fast, on-time and hassle free delivery? Caledonian Stone have partnered with a UK-wide Pallet Network that has over 90 depots throughout the UK, allowing us to offer efficient and flexible service for the best customer experience. Orders can be shipped anywhere in the UK within 2-3 days. Next Day delivery is also available on request allowing us to meet urgent deadlines.



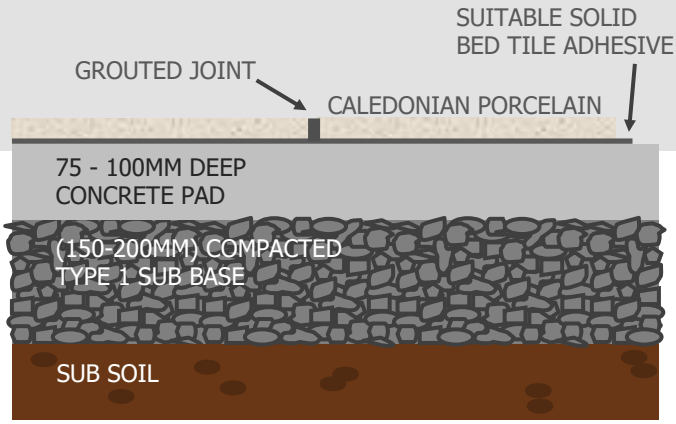
We only require two details to ensure that the delivery is successful. Firstly there needs to be off-road access for a dustbin-lorry sized truck and secondly there needs to be firm, level ground to allow the pallet(s) to be unloaded safely by tail lift. However if you have any specific delivery requirements, we are happy to try to help with these also.

PORCELAIN LAYING METHODS

There are a number of ways in which porcelain paving can be laid with each having its advantages and disadvantages. This is a **guide** is to help you decide which may be best for you.

Caledonian Porcelain paving can be laid on a sand and cement bed with an adequate compacted sub-base which is the most common way of laying paving.

We supply a trade tested Porcelain Primer and Grout which are two essential products when laying porcelain paving.



Caledonian Porcelain paving can also be laid on a screeded concrete pad.

This is a less commonly used method and is usually only used if there is a concrete pad already installed.

Caledonian Porcelain paving is rectified and extremely strong which means it can be laid on a pedestal system. This is a cost-effective way to lay porcelain paving, especially if the paving level needs to be raised or the paving is being used on a balcony.

Please be aware that this is a **guide only** and it is the responsibility of an experienced installer to ensure that the ground conditions are suitable and an adequately compacted sub-base is laid relative to the site conditions.

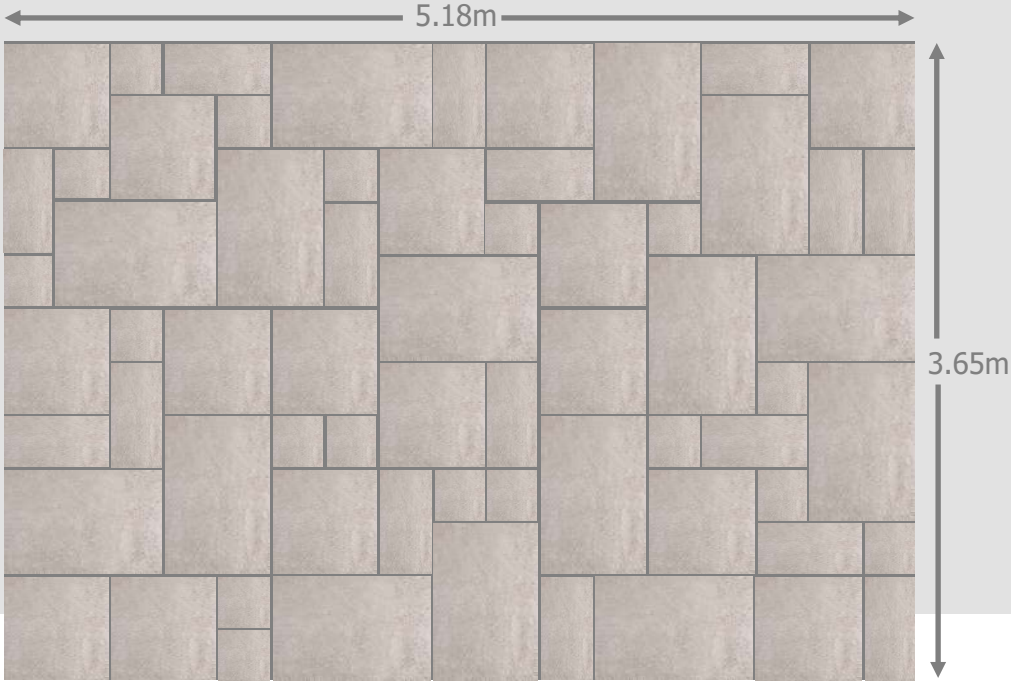
PATTERN PACK LAYING GUIDE

Pattern pack paving gives that extra style to your outdoor space. For more details on pattern-pack paving call or email our sales team.
The below diagram is to be used as a guide only.



Pattern Pack Paving Quantities

18 qty 300x300mm

16 qty 300x600mm

16 qty 600x600mm

15 qty 600x900mm

Total qty 18.36m2

SINGLE SIZE PORCELAIN PAVING CAN ALSO BE LAID IN TWO DIFFERENT PATTERNS AS SHOWN BELOW.

COLOUR VARIANCES

When purchasing paving we recommend ordering the total amount you require including any extra if you plan to extend in the future. This is due to possible colour variances between batches which can occur due to the manufacturing process of porcelain, and the fact that granite and sandstone are natural products. Ordering total requirements at the same time will ensure that all your paving will be an exact match.

Colours may also vary from the images in this brochure due to printing processes, so we recommend requesting **FREE SAMPLES** before proceeding with the full order.

ORDER QUANTITIES

There are times when your project may not need a full pack of paving so we offer a **split-pack** service. This means our customers are able to order any quantity of paving whether it is natural stone or porcelain. This makes it much easier and more cost-effective when it comes to finishing an area of paving, creating a decorative border or even adding to an existing project.

When ordering an exact quantity it is important to allow for **cutting** and **wastage.** As a guide we recommend allowing for 10% waste on each project. If you are unsure what your project may require please contact our team for assistance.

DELIVERIES

In the unlikely event of our products reaching you in less than satisfactory condition you should notify us immediately within 2 days of delivery with your order number, product details and proof of the condition, so that we can rectify the problem.
